

ATEX / IECEx Quality Systems Consultancy

David Ford QA limited is a specialist consultancy in the application of Quality Systems for Ex Equipment Manufacture providing tailored consultancy to meet specific requirements.

Development of Quality Systems for Ex Equipment Manufacture

If your organization requires an ATEX Quality Assurance Notification (QAN) or IECEx Quality Assessment Report (QAR) for a manufacturing facility. Your organization may or may not currently have a Quality System compliant to ISO 9001 (Certification to ISO 9001 is not a prerequisite). Consultancy can be given to assist your organization in developing or extending your Quality System to be compliant the requirements of ISO/IEC 80079-34 and the ATEX Directive 2014/34/EU.

ISO/IEC 80079-34:2018 has been published

The new revision of Standard ISO/IEC 80079-34:2018 (Edition 2.0) was published on Thursday 30th August 2018 and ISO/IEC 80079-34:2011 has been withdrawn. The standard been redrafted to bring it in line with Annex SL (the same structure as ISO 9001:2015 - Quality Management Systems - Requirements) which defines the framework for a generic management system. All new ISO Management System Standards (MSS) will adhere to this framework and all current MSS will migrate at their next revision.

David Ford QA Limited will be looking forward to providing consultancy in the transition period on changes to Quality Management Systems requirements for the new revision of the standard.
